## RARE PLANTS 1957

Visit our Nursery, view our pamphlet and plan to purchase a few choice plants, flowering shrubs, trees and evergreens from ALANWOLD PLANTS - SHAWHAM, PA.

These plants are not surpassed in their beauty by any other class of hardy shrubs. Many of them began to grow in 1913 and have been growing since. Still at snappy angles, they are 15 to 25 feet tall. One of the most beautiful is now has a few heads 15 feet long, 3 feet high and 2 feet in diameter. And it has a magnificent that grows in first year more over 500 flowers at one time.

These are the same plants the nurseryman uses to grow his plants for several dollars each.

These plants really cost considerable if purchased at once. But if you try to continue with a small started for you, you will be even more satisfied in two or three years' time. Not only will you save considerable money, but you will have a great deal of fun watching these little spots grow up. You can even order your own tender plants growing our plants in a nursery bed for 3 years and have them ready permanently.

The group containing Azaleas are very easy to grow. If planted in a sunny place, provided either by a building or a tall screen, this group will grow up. It is best to provide the circulation of air underneath. Plant in a sunny place, in a good light garden bed, and use granulated peat moss or sawdust mulch. After planting and water with 10% water or peat moss. Do not cultivate. Do not water. Do not allow ground to get dry, but do not water too much or too often. Use a peat moss medium. These plants will all do well in part shade and part sun. They need light for first 3 weeks and then 50%.

For further instructions purchase Hottel's Book of Azaleas or Hottel's Book of Supply either at \$4.00 per book.

For \$10.00 you can select \$6.00 worth of plants from this list. No orders of less than \$3.00 accepted. No broken lots will be sold. Prices per lot only, no discount.

Using our careful packing with wet peat moss - we do not pay postage. Kindly add 10% to all orders for postage. Allow one substitute per 10 items ordered.

Don't delay - plan to try some of these small plants at once. If you put it off - you'll forget it, sure as shootin'!

In winter time landscape gardens present a dismal, faded sight that emphasizes  
 the general dreariness of the season. Little of the beauty of spring, summer or fall re-  
 main. Yet it is so easy to change this with a few evergreen vines, shrubs and trees and  
 some bright ornamental shrubs. With an attractive evergreen background, winter seems shorter  
 and much more pleasant and nothing is a more beautiful sight than to see them partly covered  
 with snow.

PLANT IN TREES AND SHRUBS. Plant in any good soil. All should be well  
 shaded for a month after planting with a large shade or planted in part shade of a build-  
 ing. Watch with either peat moss or leaf mold. Most of the following plants will make  
 handsome specimens in three to four years.
